

MAXIMILIANO ESCOBAR VIEGAS

ABOUT ME

I like crafting and getting things done. I gravitate towards challenges that help me learn and develop new skills. I love exploring the world around me through travelling and meeting new people, and being creative, whether it is through digital solutions to people's needs or writing songs.

WORKING EXPERIENCE

WORKING STUDENT

Siemens AG, November 2023 - present

- Development and deployment of telemetry software to track performance of industrial cameras.
- Integration of neuronal network algorithms to make object detection.
- Support in the configuration of computer networks for prototype testing.

AUTOMATION CONSULTANT

Practia Global, December 2020 - December 2023

- Design, development and cloud deployment of robotic process automation software for retail companies.
- Data collection for visualization and monitoring of the business's performance via interactive dashboards.
- Constant interaction with clients to iterate solutions and showcase results.

RPA CONSULTANT

Sisua Digital, October 2018 - November 2020

- Design and development of robotic automation software for energy generation companies.
- Design and implementation of linear optimization algorithms for shift scheduling in astronomical observatories.
- Constant interaction with clients to iterate solutions and showcase results.

QUALITY ASSURANCE INTERN

Sonda, November 2017 - February 2018

- Verify the correct execution of the features programmed in contactless cards used for the payment system of the public transport of Santiago de Chile.

MAXIMILIANO ESCOBAR VIEGAS

LANGUAGE SKILLS

Spanish : Native

English : C1

German : B2

DIGITAL SKILLS

Experience coding in:

- Python
- Java
- C# (.NET)
- Rust
- Javascript
- SQL
- HTML/CSS

Experience using:

- Docker containers
- Linux CLI
- Git repositories
- APIs
- CI/CD pipelines
- Azure/AWS
- Open Telemetry
- D3.js
- PowerBI
- R Studio
- Scrum

EDUCATION

M. SC. MANAGEMENT AND TECHNOLOGY

Technische Universität München, October 2023 - July 2025

Fields of study: Energy Markets, Computer Engineering.

Topics of interest:

- Financial assessment of investment projects for photovoltaic plant for green hydrogen production.
- Development of web services to estimate solar irradiance and capacity factor of solar plants based on geographical location.

B. SC. INDUSTRIAL ENGINEERING

Universidad de Chile, March 2014 - December 2020

Fields of study: Information Technology.

Topics of interest:

- Business model design for IT companies offering Software as a Service solutions.
- Extraction, transformation and loading of data for linear programming optimization.
- Data visualization.

OTHER EXPERIENCES

PROJECT LEADER

Universidad de Chile, February 2015 - December 2017

Relevant achievements:

- Development and release of mobile application for reporting incidents within the area of the university campus.
- First place in Sonda's "Safe City Challenge". ([Press article](#)).
- Attendee of entrepreneurial workshops at the Singularity University in Silicon Valley.

ERASMUS STUDENT

Universitat Politècnica València, January 2016 - June 2016

Relevant achievements:

- Learning how to use Android Studio to develop mobile apps.
